## **Installing OretraK**

1) Go to the folder you downloaded both the setup.zip and HTML.zip files

| Name      | Date modified    | Type                 |
|-----------|------------------|----------------------|
| HTML.zip  | 2012/01/05 14:32 | Compressed (zipp...) |
| setup.zip | 2012/01/05 14:34 | Compressed (zipp...) |

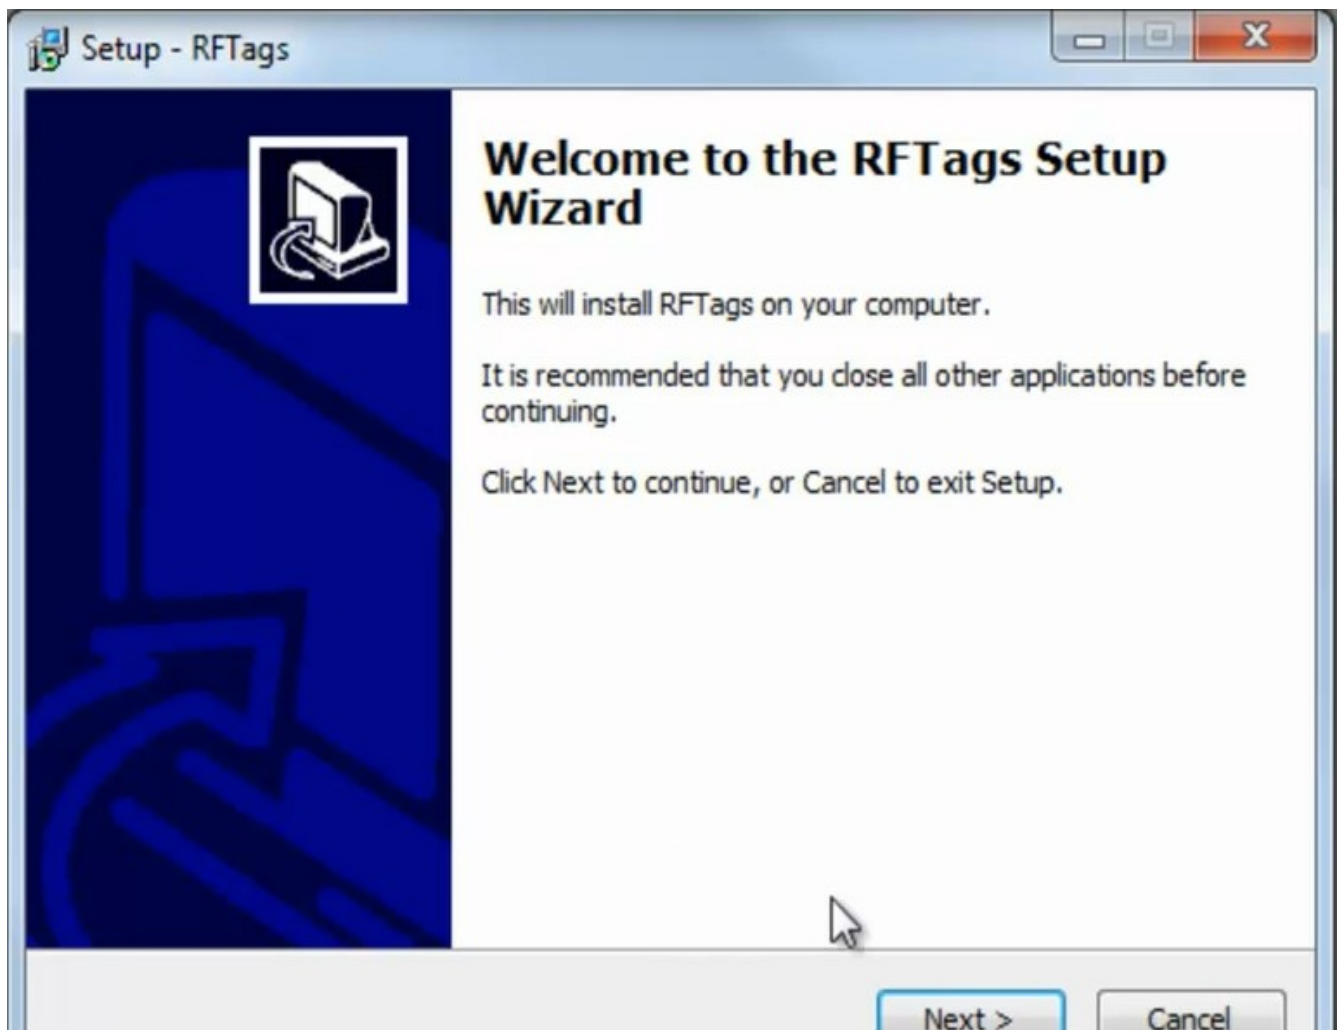

2) Unzip the files

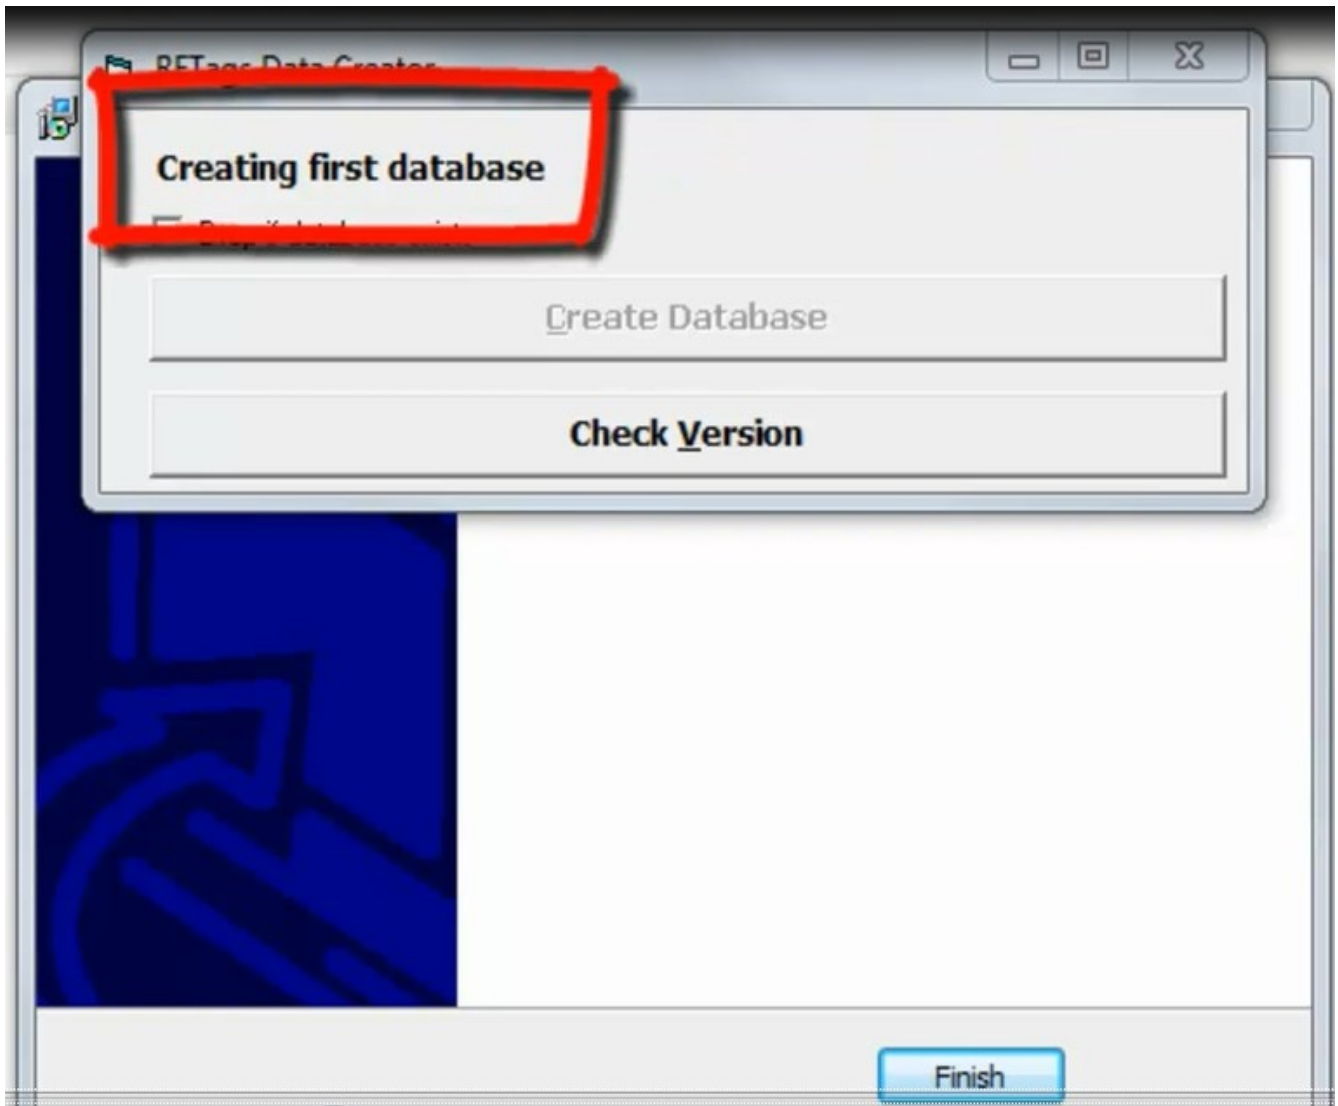

| Name      | Date modified    | Type                 | Size      |
|-----------|------------------|----------------------|-----------|
| HTML      | 2012/01/06 08:19 | File folder          |           |
| HTML.zip  | 2012/01/05 14:32 | Compressed (zipp...) | 327 KB    |
| setup.exe | 2011/12/09 06:41 | Application          | 34,941 KB |
| setup.zip | 2012/01/05 14:34 | Compressed (zipp...) | 34,928 KB |

3) Start by installing the setup.exe file FIRST!

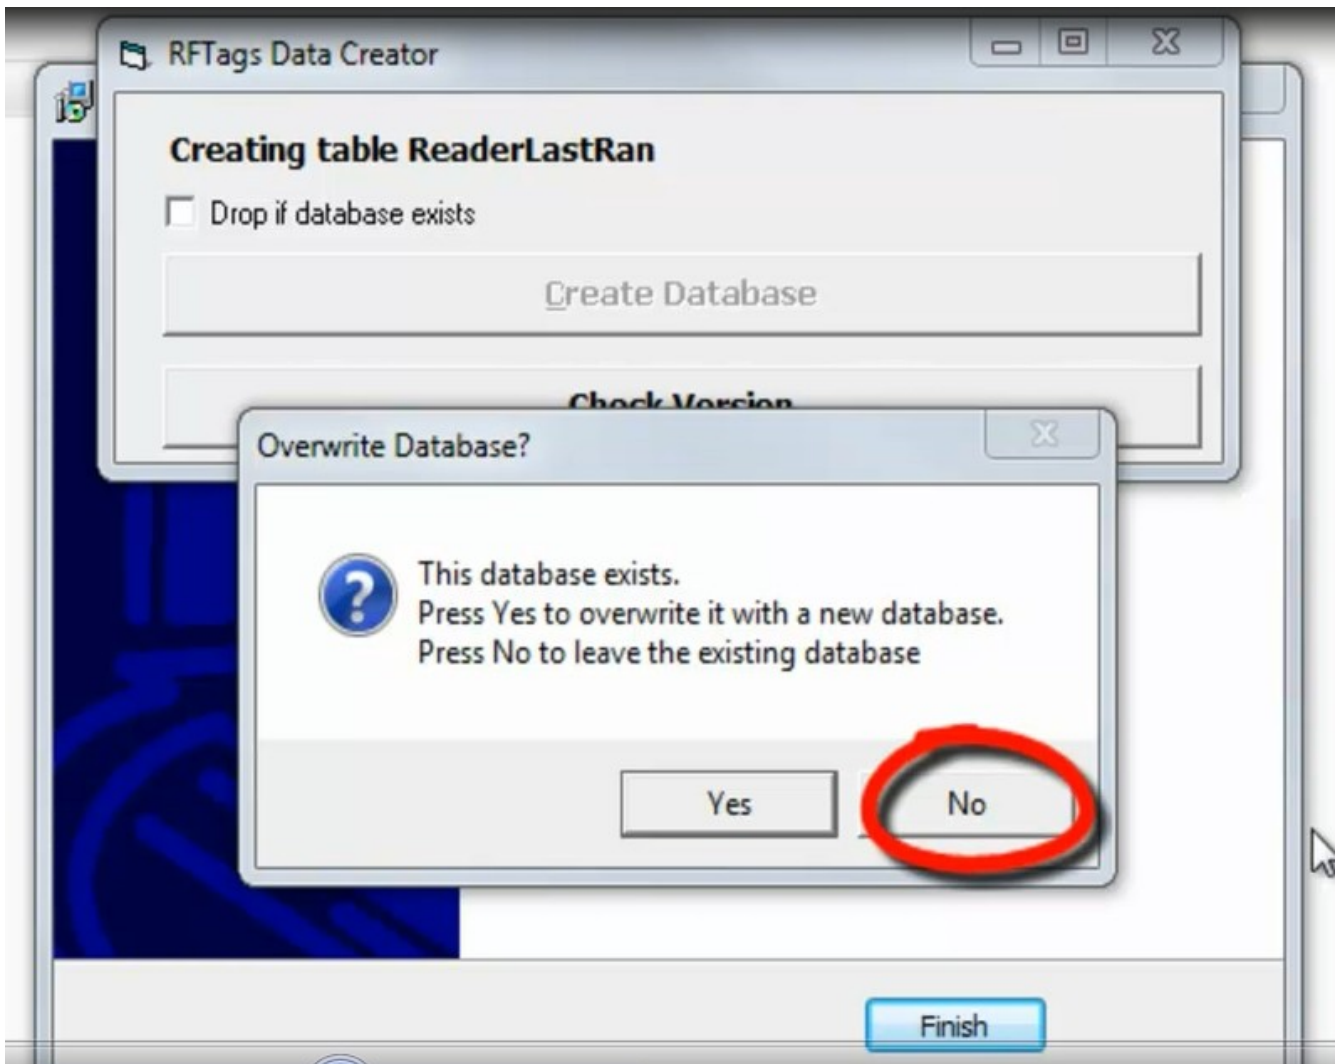

4) For each option in the installation routine, select "Next".

- 5) There are three separate packages which are installed. Please wait until you see that the database is being create:

6) You will get a pop up box saying "This database exists". Please select "No" here:

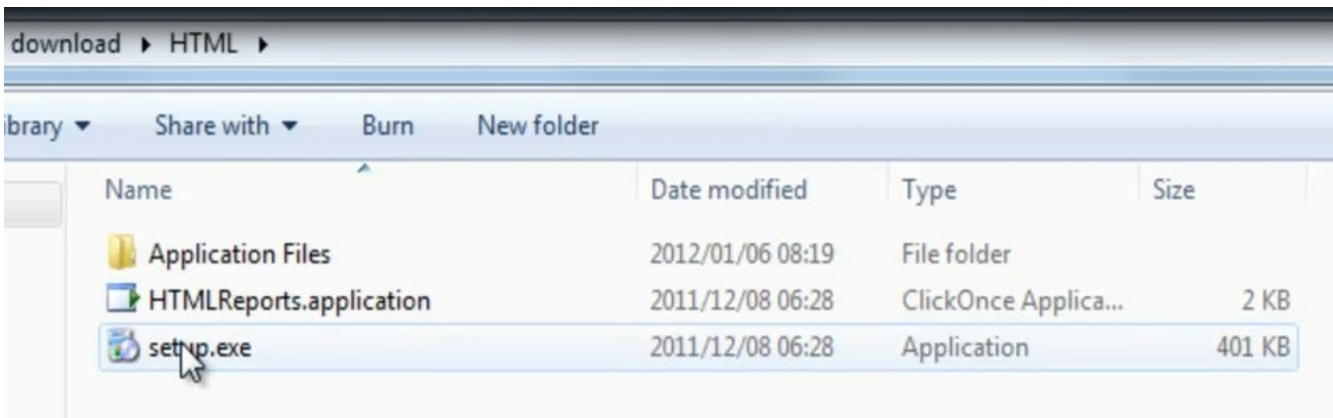

7) When the RFTags Data Creator screen disappears, you can click on "Finish" in the main installer:

- 8) The RF Tags OretraK application is now installed and is visible in both the programs listing under the start menu, and on the desktop:

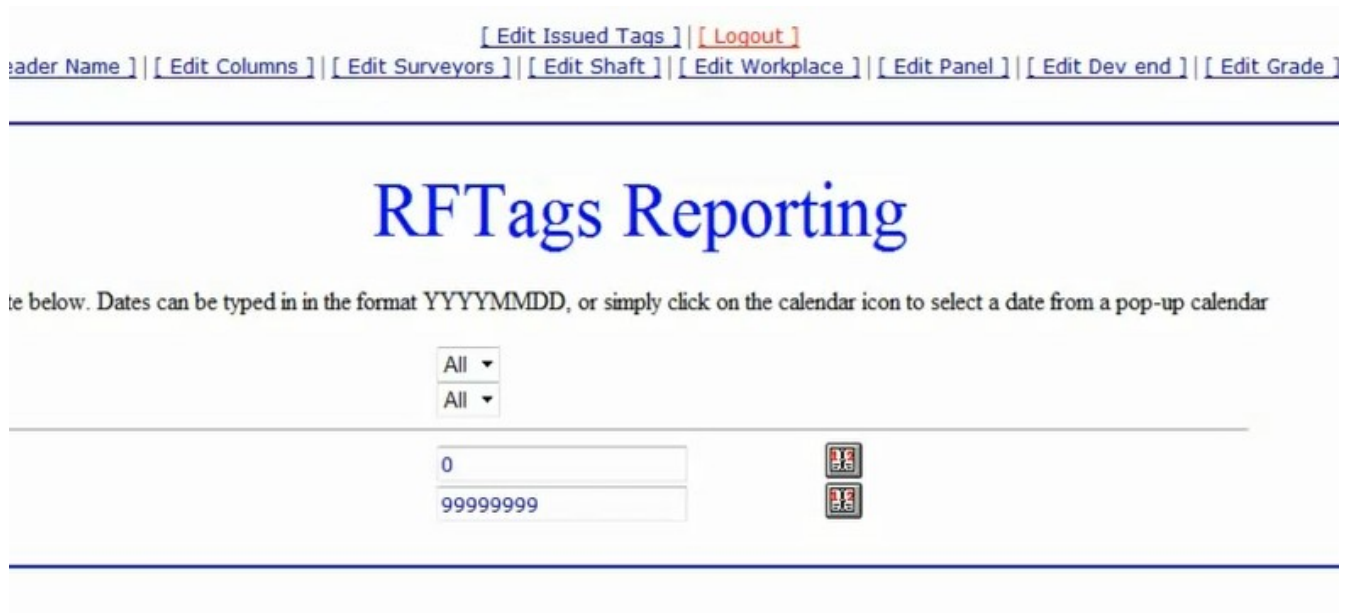

- 9) Next, we need to install the HTML Reporting software:
- 10) Go back to the folder where you extracted the zipped files and go into the HTML Folder.
- 11) In the HTML folder you will find another "setup.exe". Double click to install this:

- 12) The HTML Reporting software requires .net version 4 or later.
- 13) Click on the Install button:

- 14) When its done, it will automatically run the program.

## **64 Bit Operating Systems**

If you are installing on a 64 bit OS, please see the document called "64bitOS.pdf", or, the steps for 64 bit OS's is also covered in the video linked to below (there will also be a link to this document and "64bitOS.pdf" at the link below.

This tutorial is available as a video tutorial at <http://www.rftags.co.za/video-tutorials/oretrak/installing-oretrak-software--64-bit-os-.php>
